

Introducing the all new SedonaFSU 5.0

With the release of SedonaOffice 5.0 we are pleased to introduce the all new SedonaFSU 5.0. Over the past year Microsoft has significantly enhanced their development tools and operating environments which has allowed us to enhance the SedonaFSU with new features and functionality.

The new SedonaFSU 5.0 has been completely re-developed and now contains new features such as;

- **Field Level Replication** – conflicts are now resolved at the field level so data is no longer overwritten.
- **Job Management Scheduling** – now you can schedule Job Appointments just like Service Appointments.
- **Sales Tax Calculation** – sales tax information is now contained in the billing summary.
- **Central Station Tracking Data** – complete central station data now merges to the FSU.
- **Improved Synchronization Speed** – new technologies boost sync speeds by 3 to 5 times faster.

The new SedonaFSU 5.0 uses either the Windows Mobile 5.0 or 6.0 operating environment and Microsoft SQL Server 2005. Prior to using the SedonaFSU 5.0 you will need to upgrade your SQL Server to version 2005 and upgrade your SedonaOffice to the new 5.0 version.

The new SedonaOffice 5.0 interface has been enhanced with new controls and an easier to view display.

SedonaFSU 5.0 Price List:

Item	Description	Amount	Monthly Support
